If You Are Going to Buy a
WHEAT DRILL

Why not buy the best "SUPERIOR"
The name tell a true story.

JUST ASK
YOUR WIFE

She will say "YES."

Then she will want to come to the store that is enterprising enough to remind her husband about it.

And when she does she will find the South Bend Malleable Range, the most perferable Range on the market.

Because Satisfaction is the test.

INFECTED CORN EARS

First Indication Is a Fading of the Husks.

Kernels Are Shriveled, Very Brittle and Loosely Attached to the More or Less Rotten Cob—Characteristic of Rots.

(By T. J. BURRILL.)

Everyone who has had anything to do with harvesting corn has noticed at least an occasional ear that differed remarkably from the normal ones in being more or less covered with and penetrated by mold. In many cases the husks and silk are also involved and appear cemented together

Two Ears Infected With Diplodia; That on the Left in the Silk; That on the Right at the Rose.

and to the ear by a mass of white, cobwebby filaments. At the same time the parts affected have lost their substance, are light in weight and brittle in texture.

Upon close study it soon becomes apparent that there are several of these ear rots, or at least that there are differences which seem fairly constant when numerous specimens are carefully examined. It is thus possible to divide the affected ears into four groups, as follows: Diplodia, Fusarium I, Fusarium II, Fusarium III.

Some of these rots are so similar that the casual observer rarely entertains any suspicion of their being but one form. The resemblances are so complete in some instances that the removal of the husk and sometimes a microscopic examination are needed for the classification of the variety. Commonly, however, in fairly advanced stages of the disease one or more characteristic differences are apparent. The two forms most easily confused are the Diplodia, in which the color of the moldy growth is white, and Fusarium II, in which it is pink to red.

The first indication that ears of corn are diseased is a fading of the bright green of the husks to a pale yellowish green color. In Diplodia this change goes on gradually, and under favorable conditions quite rapidly, until the entire ear has the appearance of premature ripening. While this change of color on the outside is progressing one finds the inner husks have not lost their normal color, but are more or less tinged with brown, particularly along the advancing margin of the diseased area. This description also applies to the disease produced by Fusarium II, although not entirely decayed ear due to this organism has been found. In this case infection always begins at the tip and proceeds downward, rarely involving more than half of the ear.

The diseased ears shrivel up more or less, become darker in color and

Fusarium I. Fusarium II. Lighter in weight. The kernels are also shriveled, are very brittle, and are loosely attached to the more or less rotten cob. The silk is moldy and adheres by the mass of fungous threads to the inner husks and corn. The fungus penetrates all parts of the ear, sometimes extending into and badly injuring the shank.

The premature yellowing of the husks of plants otherwise healthy is an indication that a diseased condition exists.

OUTLOOK IN "DARK BELT" REPORTED MUCH BETTER

Loose-Leaf Warehouse Will Be Operated In Henderson For First Time.

Henderson, Ky., Nov. 2.—Prospects are brighter for an early sale of tobacco at good prices in the "Dark Belt." The quality is so good and the crop so short it is believed by tobacco men that these conditions will more than overcome the effect that the war may have had on the local market. For the first time in the history of Henderson a loose-leaf floor is getting ready for business. It will be operated by Berk & Lancaster, of Owensboro. Gallaher, of Belfast, will be in the market. The Imperial Tobacco Company will be in the market if it wins in the higher court, and it is said that the Hodge Tobacco Company will be in the local market.

VICK'S Group and SALVE FOR ALL COLD TROUBLES

How to Carry a Suitcase.

Travelers will be interested to learn how to carry a suitcase or valise a long distance without becoming fatigued. A French savant, reasoning that the tired feeling is induced by the fact that the action of carrying such an object hinders the movement of the legs, makes a suggestion that is said to work like a charm. The Frenchman's way to prevent the inconvenience is to put under the arm a bulky packet made of a dozen newspapers folded. The handbag, in this way, is far removed from the legs, allowing walking without hindrance.

Edison's Latest.

The test of Edison's latest invention, an electric battery for use in submarines, is progressing satisfactorily and may be adopted by the Navy Department.

"ONE WONDERFUL NIGHT"

Princess This Week

PURELY PERSONAL.

Capt. James G. Heister, of Chicago, is the guest of Mr. C. H. Bash. Judge Heister formerly resided at Lafayette.

Mrs. M. A. Meacham, of Gracey, is visiting her son, Chas. M. Meacham, this week.

Mrs. E. W. Bottomley, of Louisville, is visiting the family of her son-in-law, Mayor Frank K. Yost.

Mrs. Leslie Haydon returned from Trigg county yesterday, where she attended the funeral of Mr. Lucian Henderson.

Journalist Bought Suez.

The journalist is often the man behind the statesman, but he seldom gets the credit. Who was it that induced Mr. Disraeli to buy the Suez canal shares which have proved so abundantly good an investment, with dividends that are represented not only by money, though even from that point of view it is the best investment that a state has ever made? Fleet street knows and honors the name of Mr. Frederick Greenwood, both for that reason and for many another. But how many outside the world of journalism realize that but for Mr. Greenwood the Suez canal shares would probably have been purchased by a rival continental power? The question was one of those put in a "general intelligence" examination paper a little time back at a certain school. Only one boy was able to answer it correctly, and he was the son of the prime minister.—London Chronicle.

Built a Fort.

Owing to recent operations in Hopkins county of so-called "possum hunters" in which a watchman was whipped, a negro boy killed and negro miners warned to leave, mine operators at Carbondale and elsewhere have built a fort and placed armed guards over their property, fearing further trouble.

AN INCIDENT OF WAR.

Indian Troops Enter German Lines and Blow Up Ammunition.

The correspondent of the Daily Mail in Paris describes how the Gurkhas (native Indian troops) blew up a German ammunition park, thus causing some of the German coast batteries to move to the rear. He says:

"All the efforts of the Allies' artillery against these batteries have been unavailing and the Germans were causing severe losses when the air scouts located the ammunition stores seven miles behind the German lines.

"At night the Gurkha detachment embarked on gunboats, which proceeded to the mouth of the Yser, and after a long, silent march the Gurkhas reached the German ammunition stores guarded by six sentries. Six silent figures moved toward them, each carrying a long knife. Then a sound like the croaking of a frog was heard and the six sentries disappeared.

"Shortly afterward the general staff of the Allies saw a great flash of light on the horizon and heard a great explosion, followed by countless others as the shells and shrapnel in their cases exploded in all directions. The Gurkhas returned safely to the gunboats."

REX To-day

Turkey's warfare seems to be only against Russia, but that is enough to lead the London Times to remark that she has sealed her own doom. The Ottoman Empire in Europe will soon be merely a memory..
